I. General description and use

PP-366 is a high quality competition barrier, which is designed for water jump in steeplechase race. The barrier does not require any track sockets. The telescopes, which are protected with special rubber aprons, guarantee a long product life and an easy operation.

II. Technical specification

PP-366

Barrier type	competition, for water jump
(A) Top beam	multilayer wooden beam, painted
(B) Telescopes	steel powder painted, spring-loaded knob system of height adjustment, equipped with special rubber aprons against moisture
(C) Feet	steel powder painted
(D) Fastening to the track	by means of 2 counter-tie pins, which come with the barrier
Length [mm]	3660
Heights [mm]	762
	914
Weight [kg]	83

III. Operation and maintenance

The barrier should be fastened to the track by means of the counter-tie pins which come with it. During idle periods the barrier must be stored in a roofed dry place.

Attention! The rubber aprons of the telescopes are coated with a long lasting protection film against UV radiation during the production process, in order to maintain a proper condition of apron rubber UV protection agents should be regularly applied on them.

After every athletics season the barrier must be cleaned from sand (mud, dust and etc).

IV. Packing and transport

The product is packed in cardboard and foil. The product needs to be assembled.

Package's dimensions [cm]	contents	1 barrier
	length	410
	width	17
	height	30
Volume [m³]		0,21
Gross weight [kg]		86
