p.ciechanowski@polanik.com

I. Use

Polanik wind ribbon indicator is designed to show the actual wind direction at the athletics arena during track events, vertical and horizontal jumps.

II. Technical specification

Code	WIR-S429
Pole	steel tube powder painted, with ribbon
Base	steel powder painted
Ribbon length [m]	approx. 2 x 0,7
Height [m]	approx. 1,76
Net weight [kg]	10,25
Gross weight [kg]	11

III. Assembly

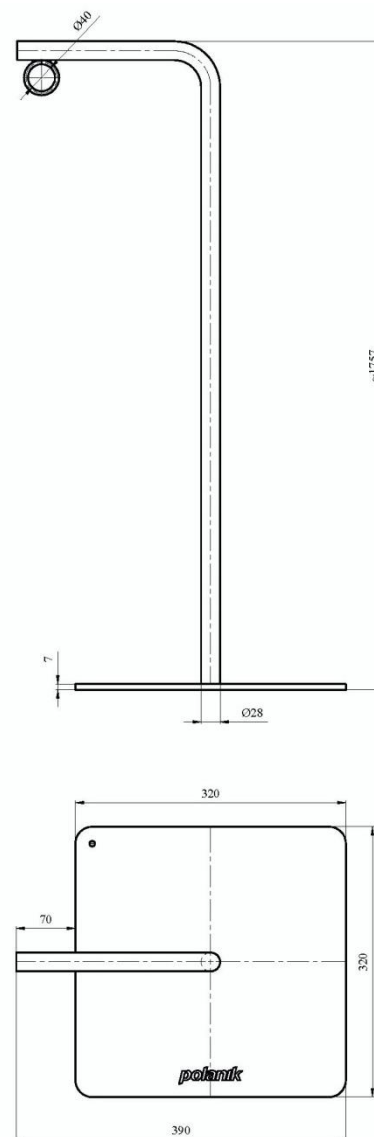

- 1.) Put the pole on the base bar
- 2.) Screw down the blocking handwheel until you feel considerable resistance.

IV. Packing and transport

The product is transported disassembled and it is packed in foil.

V. Maintenance

After each use the product should be cleaned from sand and stored in a dry roofed place. Please note that the included ribbon may get dirty and unravel which is normal tear and wear and then it should be replaced with a new one.

Even the best technical solutions cannot substitute for common sense. The usage of the product must take place under the supervision of sports facility technical staff. The producer shall not be liable for any incidents caused by the improper assembly or its misuse. The producer reserves the right to introduce without warning changes in product constructions and colours.
