### I. General description and use

The synthetic insert makes it possible to install the Polanik take-off boards in the foundation tray which is 340 mm wide. The insert fills in the space of 40 mm, which is the difference between the Polanik standard width and non-standard trays. Below the Polanik take-off board with training indicator board are installed in a non-standard tray.

### II. Technical specification

Product code	WU16-250
Type	competition take-off board accessories
Material	synthetic
Dimensions [mm]	1220 x 100 x 40
Net weight [kg]	4,72

[mm]

### III. Packing and transport

The product is packed in bubble wrap and stretch foil.

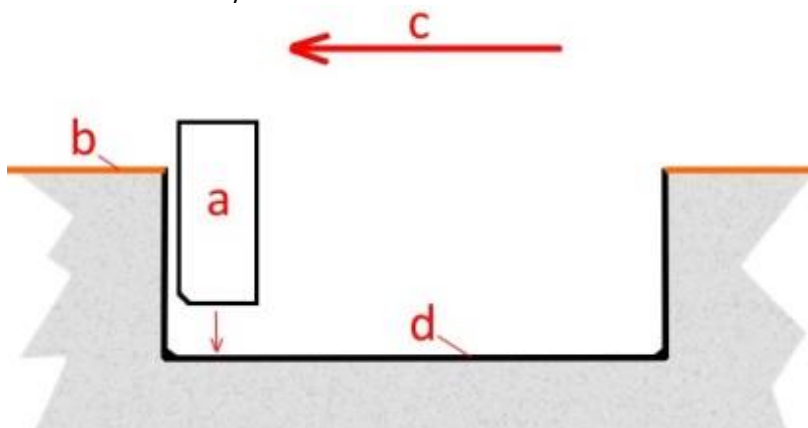

Dimensions [m]	Capacity	1 pc
	Length L	1,23
	Width B	0,11
	Height H	0,05
Volume [ m <sup>3</sup> ]		0,067
Gross weight [kg]		4,8

### IV. Assembly

The synthetic insert is put inside the tray. It is installed vertically at the tray wall which is the nearest one to the landing area, so that the cut edge of the insert points to the tray bottom.

Cross section view – non-standard tray installed in the runway
