

TECHNICAL SPECIFICATION **INSTRUCTION MANUAL**

Competition steeplechase barriers

PP-396 and PP-500

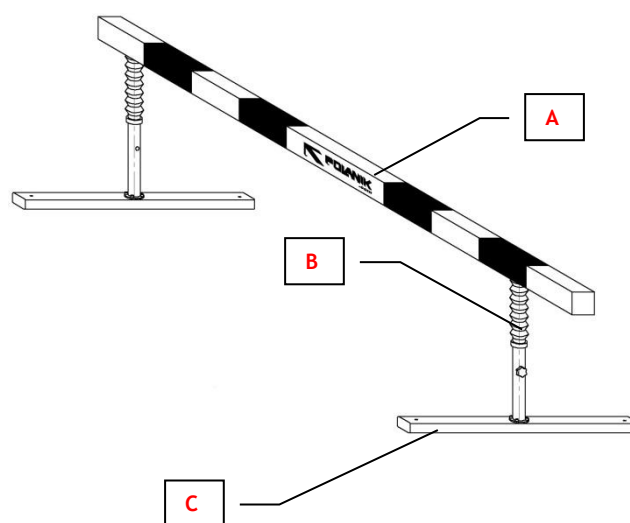

I. General description and use

PP-396 and PP-500 are high quality competition barriers, which are designed for steeplechase race. Innovative construction of the telescopes protected with special rubber aprons, guarantees a long product life and an easy operation.

II. Technical specification

	PP-396	PP-500
Barrier type	competition	competition
(A) Top beam	multilayer wooden beam, painted	multilayer wooden beam, painted
(B) Telescopes	steel powder painted, spring-loaded knob system of height adjustment, equipped with special rubber aprons against moisture	steel powder painted, spring-loaded knob system of height adjustment, equipped with special rubber aprons against moisture
(C) Feet	steel powder painted	steel powder painted
Length [mm]	3960	5000
Height [mm]	762	762
	914	914
Weight [kg]	85	93

III. Operation and maintenance

During idle periods the barriers must be stored in a roofed dry place.

Attention! The rubber aprons of the telescopes are coated with a long lasting protection film against UV radiation during the production process, in order to maintain a proper condition of apron rubber UV protection agents should be regularly applied on them.

After every athletics season the barriers must be cleaned from sand (mud, dust and etc).

IV. Packing and transport

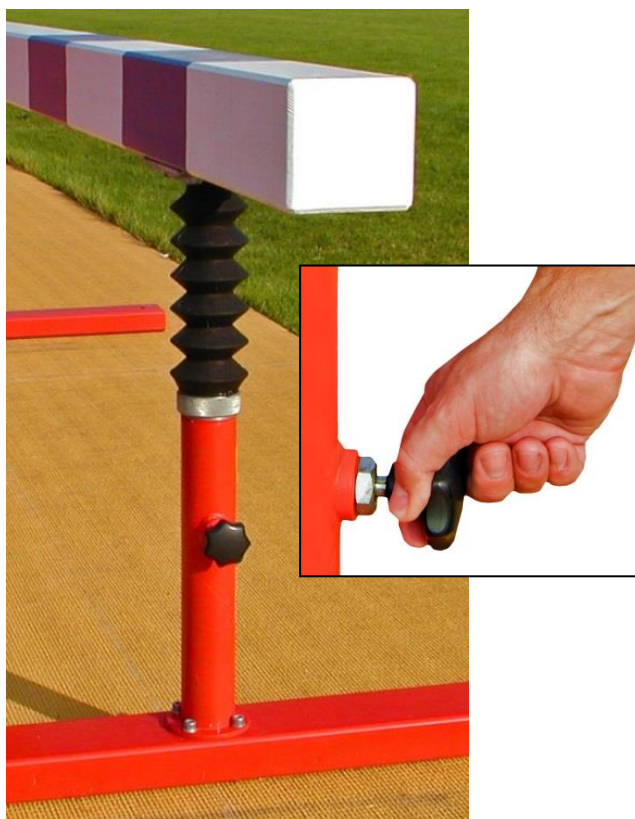

The product is packed in cardboard and foil. The product needs to be assembled

Barrier	PP-396	PP-500
Package's dimensions [cm]	contents	1 pc
	length	410
	width	17
	height	30
Volume [m ³]	0,21	0,26
Gross weight [kg]	88	96
