ATTENTION!

The product is an electronic device and it requires careful handling!

1. General use

ZPCV15 is a basic timing system for track events in the athletics. It allows you to record the competitors' times with the resolution up to 1/1000 s. The shot from the starting revolver initiates the timing of the chronometer and the time is recorded when the infrared beam of the sports photocell is tripped by the competitor. The chronometer can record up to 2000 results. Thanks to the thermal printer of the chronometer the results can be printed out. IdentiLynx camera is an additional element of the photo finish system in athletics, which help to identify players emerging at the finish line.
